**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 27-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 27, lines 5-6, "wherein N-type source/drains are formed in the semiconductor substrate between formation processes of the two gates and the gate spacers" is not clear. Does this mean that there are a series of "formation processes" for forming the gates and the spacers, and that the source/drain regions are formed between one of more of these "formation processes"? Or does this mean that the source/drain regions are formed after formation of the gates, and before the spacers? (Do either of these interpretations correspond to the specification?) Or does the language mean simply that the source/drain regions are formed to extend between the two gates and the gate spacers?

Claims 1-12 are allowed. Claims 27-31 would be allowable if the above issue, raised under 35 U.S.C. 112, is clarified.

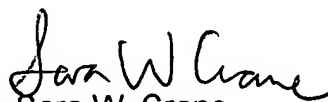

Art Unit: 2811

The prior art cited on form PTO 892 show implant into source/drain regions through polysilicon, or show multiple layers including polysilicon as source/drain contacts.
